Indo Group, a leading provider of marine and industrial electrical solutions in India, is the official distributor of Cristec, a renowned French manufacturer of advanced power electronics for the marine and mobility sectors. This strategic partnership reflects Indo Group's commitment to delivering cutting-edge, reliable, and efficient power management systems to clients across India.

Cristec, based in France, is internationally recognized for its innovation in battery chargers, inverters, DC/DC converters, and complete energy management systems designed for challenging environments. With over three decades of expertise, Cristec has become a trusted brand among naval architects, OEMs, and shipyards globally.

As the authorized distributor, Indo Group ensures:

- Seamless availability of Cristec products across India
- Certified technical support and service for installation, maintenance, and troubleshooting
- Tailored power solutions for marine vessels, defense applications, recreational vehicles, and industrial use
- Access to genuine Cristec products, backed by warranty and factory-trained support

Indo Group's collaboration with Cristec reinforces its mission to empower Indian clients with high-performance, durable, and efficient energy systems, while ensuring international quality standards and responsive after-sales service.

For technical inquiries, product information, or dealership opportunities, contact Indo Group – Your Trusted Cristec Partner in India.

Battery Chargers

CRISTEC offers expertise on an international scale with a distribution network present in more than 50 countries. Having already sold more than 200,000 units throughout the world, CRISTEC has developed a complete range of battery chargers.

Our models of AC-DC chargers are as follows :

- New range YPOWER PLUS - medium power
- Range HPOWER - high power
- Range HPOWER DNV-GL - high power type approved
- Range YPOWER - medium power
- Range YPOWER with factory option board - medium power
- Range CPS3 - high power previous generation
- Range CPS - small power

We have also developed a range of DC-DC chargers stemming from the YPOWER range.

YPOWER DC-DC chargers-converters have been designed to charge a 12, 24, 36 or 48V battery bank from a 12, 24, 36 or 48V network. The most typical case of use is the 24V bow-thruster battery bank charge from the 12V onboard network.

In order to reduce mounting time and optimize space for our AC-DC chargers, we have developed a range of high power 12V 40 and 60A YPOWER PLUS shore-power units.

They integrate combine, in a single cabinet, the AC protection and distribution, as well as an automatic battery charger.

User protection consists of a two-pole differential RCD (Residual Current Device) and the distributions are made by 2 to 6 two-pole circuit breakers (Over Current Protection Device).

The battery charger function is ensured by an HF switch-mode electronic card, stemming from the latest YPOWER PLUS generation. The range of YPOWER shore-power units from 16 to 40A is still available.

HPOWER AC-DC BATTERY CHARGERS
High Power Range

HPOWER CERTIFIED
High Power DNV-GL Range

DC POWER +

CPS AC-DC BATTERY CHARGER
Small Power Range

YPOWER AC-DC BATTERY CHARGERS
Medium power range
in 12v and 24v

YPOWER BATTERY CHARGERS WITH FACTORY OPTION BOARD
Medium power range
in 12v and 24v

YPOWER PLUS AC-DC BATTERY CHARGER
New Medium power range
in 12v and 24v

CRISTEC CONNECT BLUETOOTH APPLICATION

IP65 POWER PLUS WATERPROOF AC-DC BATTERY CHARGER
New Medium power range
in 12v and 24v

ICPS3 AC-DC BATTERY CHARGERS
Previous high power generation

YPOWER AC-DC BATTERY CHARGER
Designed to charge a 12, 24, 36 or 48V battery bank from a 12, 24, 36 or 48V Network.

YPOWER SHORE POWER UNITS
Unique box: battery charger AC
Distribution and protection

UE POWER + SHORE-POWER UNITS
Unique box: battery charger AC
Distribution and protection
